

PARTNERSHIP BACKGROUND

- Launched in 2005, *Power for Youth* is focused on empowering adolescents in five countries: Kosovo, Montenegro, the Philippines, Vietnam and China by teaching them 21st century skills: critical thinking, collaboration, and leadership.
- In 2020, ING and UNICEF Innovation launched *Fintech for Impact* in the Philippines to support start-ups that are developing digital solutions to empower young people, children and families.
- Since the launch of our partnership in 2005, we have touched the lives of over 1.5 million children.

“Financial services have been expanding quickly. Governments are also pushing for greater inclusivity in financial services including families and young people. Digital financial platforms allow for wider financial services, while providing social protection. This is why we have partnered with UNICEF to help develop fintech solutions by providing an equity-free investment, and mentoring early-stage open source start-ups in the Philippines.”

*-Hans B. Sicat
ING Philippines country manager*

SAP + UNICEF

PARTNERSHIP BACKGROUND

- Launched in 2019, the strategic multi-million dollar partnership will focus on generating inclusive opportunities for underserved young people worldwide, preparing them for decent work by equipping them with the hard and soft skills needed to make the most of future work opportunities.
- The partners aim to help develop sustainable, scalable education models to provide more than 1.5 million young people with 21st century digital and life skills by 2022.
- The collaboration will help reach young people across Africa, Asia and Europe, with initial efforts focused on India, Turkey and Vietnam.

“Businesses need to take meaningful steps to upskill the current and future workforce, regardless of their age or where they live in the world. Together with UNICEF, SAP will focus on starting in the classroom where the foundation for every career is built. We will increase collaboration with the public sector and focus on the best possible curriculum to prepare future workers. This is another example where doing what’s right and doing what’s right for business are in perfect harmony.”

*-Bill McDermott
SAP CEO*

PARTNERSHIP BACKGROUND

- Launched in 2019, this collaboration will support Generation Unlimited, a multi sector partnership aimed at helping 1.8 billion young people transition from school to work by 2030.
- The partnership will address global needs:
 - Encourage a global movement by engaging leaders from government, industry and the international community and urging them to rally behind young people and invest in the development of 21st century skills for the next generation of talent.
- The partnership will address local needs:
 - In South Africa, to build Science, Technology, Engineering, Arts and Mathematics (STEAM) skills for young women.
 - In India, to help transform education, skilling and employment with and for India's 300 million-plus young people.

“We believe business has a responsibility to help address the upskilling challenge for all of our stakeholders, including the communities in which we live and work and all of their citizens.”

*-Bob Moritz
Chairman of the PwC Network*
